EXHIBIT 1

UNSWORN DECLARATION MADE UNDER 28 U.S.C. § 1746

I, ABUL SHAH, of legal age, Chief Operating Officer of AWMR, and resident of New York, N.Y., hereby declare under penalty of perjury under the laws of the United States of America that the following account is true and correct based on my personal knowledge of the facts.

1. I am the Chief Executive Officer of AWMR.
2. Today, we went to the CEMEX plant in order to carry out a visual inspection and an inventory of the property belonging to AWMR at the site.
3. While there, I observed that many of the materials and metals that had been left idle on the structures when AWMR was removed from the CEMEX site in June, were no longer there.
4. Also, items like a copper dynamo chain, which was located in the mill area, some aluminum and steel located in the second story of the mill area, and a great quantity of copper wiring which we prepped and readied to be removed, just to name a few, all which AWMR left behind when AWMR was removed from the CEMEX site, are now gone.
5. CEMEX personnel objected to our taking pictures of the condition of the plant and so told us, forcing us to stop what we were doing.
6. In spite of the fact that it was an inspection to take inventory of AWMR equipment and property, we were not allowed to effect a full inventory.
7. Several machines belonging to AWMR were not located on the CEMEX plant itself but in a nearby compound, which AWMR employees called the "motor pool", which is the property of CEMEX.
8. This site was where AMWR was effecting a lot of cutting of the metal it was extracting.

9. As a matter of fact, a lot of metal that AWMR removed from the site and is the object of this lawsuit is lying in that compound, together with a container and other equipment belonging to AWMR.

10. We were not allowed to take inventory of that site.

11. I have seen Ecoterra personnel on this very day back at the motor pool, which is owned by CEMEX, and actively working on the metals in the site, all while this case is ongoing.

12. While the subject scrap metal harvested through the expense and labor of AWMR and its contractors sits on the facility, the metals are now being made available to Ecoterra for removal from the site, who is, in fact, cutting and removing them, as I saw today.

13. CEMEX keeps impairing AWMR from not only recovering the fruit of its own labor and expense, but also from meeting its consequent contractual obligations with other entities for the metal and materials, which had AWMR had previously contracted with.

14. The fact that Ecoterra is openly working on the site and extracting materials puts in jeopardy AWMR's loaded containers and other materials lying on the site.

15. CEMEX is actively preventing the inventory and quantification of Plaintiff's property at it Ponce site.

Executed under penalty of perjury this 17th day of August, 2007 in San Juan, Puerto Rico.

ABUL SHAH
Chief Operating Officer of AWMR
